PROFESSIONAL SUMMARY

Computer Science and Engineering (Data Science) graduate with a strong academic foundation in Python programming, Object-Oriented Programming (OOP) concepts, and Data Structures & Algorithms. Hands-on experience with SQL, data processing (Pandas, NumPy), and AI/ML concepts through academic and internship projects, including model building, debugging, and automation. Comfortable working with data cleaning, EDA, and visualization tools (Power BI, Tableau, Excel) to turn raw data into actionable insights. Eager to apply strong analytical and problem-solving skills to develop, test, and maintain Python-based applications as part of a collaborative, fast-paced development team.

EDUCATION

B.E in Computer Science & Engineering (Data Science), MVJ College of Engineering, Bengaluru *2020 – 2024*
CGPA: 8.41 / 10

SKILLS

Programming: Python, SQL, Java (OOP concepts)

Data Structures & Concepts: Data Structures & Algorithms, ETL, Data Cleaning, EDA, SDLC exposure

AI/ML & Data Processing: Pandas, NumPy, Polars, Scikit-learn, ConnectorX, Machine Learning fundamentals

Database: MySQL, SQL querying

Visualization & Reporting: Power BI, Tableau, Excel

PROJECTS

Data Analysis & Preprocessing of Ames Housing Dataset *Apr 2025*

- Cleaned and preprocessed 2,900+ housing records using Python (Pandas, NumPy), applying structured logic to handle missing, numerical, and categorical data.
- Performed exploratory data analysis (EDA) and built visualizations with Matplotlib and Seaborn to surface pricing trends and correlations for data-driven decisions.
- Applied AI/ML concepts to build and validate a Linear Regression model, improving price-prediction accuracy — covering the full workflow from data processing to model evaluation.

Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Volume Controller Using Hand Gestures — Python Automation Application *Oct 2023*

- Built a real-time Python automation application using OpenCV and MediaPipe to control system volume through hand-gesture recognition, applying OOP-based program structure.
- Achieved 95% gesture-detection accuracy through iterative coding, debugging, and troubleshooting of hand-landmark distance calculations.
- Demonstrated practical Python programming and software development skills in delivering a responsive, real-time system.

Tools: Python, OpenCV, MediaPipe, Matplotlib

CERTIFICATIONS

- Python, R & HTML — IIT Bombay Spoken Tutorial
- Data Analytics Program — NASSCOM Foundation (2024)
- Data Analyst Intern — DataLense Services (2023)
